## (54) CELLULAR PHONE COMMUNICABLE IN MULTINATIONAL LANGUAGES AND GUIDE CENTER SYSTEM

## (57) Abstract:

PURPOSE: A cellular phone communicable in multinational languages and a guide center system, is provided to select a service language in the cellular phone rented in the guide center, and a system among a direct guide system by a guide, an automatic voice service system and an interpreter guide system, and to press corresponding numbers, so that a cellular phone possessor can get a service in a desired language in a foreign country according to the guidance of the selected system.

CONSTITUTION: A multinational languages memory chip(4) and a dial guide memory chip(5) are built in a cellular phone body(1). The multinational languages memory chip(4) memorizes multinational lanquages separately. The dial quide memory chip(5) memorizes a dial quide program according to systems. Memorized programs of the memory chips(4,5) are connected to quide systems by the lanquage and type of a multinational lanquages guide center.
